### **DETAILED ACTION**

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Moore. The multifunction air knife 12 taught by Moore comprising a manifold connected to an air source and an air source control that varies an air pressure supplied to the manifold in response to a predetermined condition (column 4, lines 43-50). The air source control varies the air pressure between states (column 4, lines 43-50). The predetermined condition is based on weight (column 4, lines 43-50).

#### ***Response to Arguments***

- ~~3. Applicant argues that Moore does not vary the air pressure based on weight. However, Moore clearly teaches that the air is varied based on the number of sheets in column 4, lines 43-50. Applicant claims remain rejected as discussed above.~~

#### ***Allowable Subject Matter***

4. Claims 4-5 are allowed.
